

Brine Shrimp/Prawn FLAKES

A staple diet in many hatcheries, Bio-Marine's Brine Shrimp/Prawn Flakes are a full flake allowing specific sizing to your own requirements. A composite diet containing primarily marine based proteins and Artemia bio-mass, it is essential for any hatchery growing Penaeid post larvae shrimp. Bio-Marine's Brine Shrimp/Prawn Flakes offers flexibility to any hatchery's feeding regimen from Mysis through PL-20 stages.

<i>Proximate Analysis</i>	% DRY WEIGHT
Protein	52.00%
Fat	12.00%
Ash	8.00%
Moisture	6.00%

<i>Fatty Acid Profile</i>	Fatty acid	mg/g
Eicosapentaenoic	20:5(n-3)	1.5
Docosahexaenoic	22:6(n-3)	1.7

Ingredients: Contains: Marine proteins, purified fish oils, lecithin, Artemia, mysis shrimp, spirulina, AlgaMac (Schizochytrium algae), vitamins, protected minerals, and antioxidants..

For best results: Crush the flakes and push through a metal sieve or screen to the desired size.

Please note: Trying to push flakes through a cloth mesh bag will give unfavorable results. The particle size is generally too big and will not allow enough flakes to be pushed through this type of bag.

A rigid metal sieve is the ideal method for sizing this flake
