

Formulated Diets™

ABM 4000 Series Diets (50-125-250-350 Micron)

The 4000 series diet is a consistent microparticle diet that is ideal for supplementing your current feeding regimen or if you're organizing new feed schedules. Bio-Marine's Family of Feeds are tailored to larval/post larval stages of development (see chart below). Manufactured from primarily marine based proteins and fish oils, ABM 4000 series formulated diets are a hassle free addition to any feeding regimen and essential for any hatchery growing Penaeid post larvae shrimp. Bio-Marine's 4000 series formulated diets covers a wide range of larval/post larval rearing. Supplement other Bio-Marine diets for a well rounded nutritional regimen. The recommended ranges for each size are shown below:

Cat#	Micron Size	Feeding Range	Combine with Bio-Marine's..
ABM4000	50	Zoea-3, Mysis 1 & 2	MicroMac-70, Algamac-2000 (direct feed and as enrichment), Spirulina.
ABM4001	125	Mysis 2 to PL-1	MicroMac-70, Algamac-2000 (direct feeding and as enrichment), Bio-Marine Artemia Cysts, Brine Shrimp/Prawn Flake
ABM4002	250	PL-1 to PL-5	Bio-Marine Artemia Cysts, Acclimac-10, Brine Shrimp/Prawn Flake, AlgaMac-3050
ABM4003	350	PL-5 to PL-15	Bio-Marine Artemia Cysts, Brine Shrimp/Prawn Flake
