MicroMac-30 MicroMac-70

Microencapsulated Diet for Larval Rearing

MicroMac 30 and 70 were designed specifically for the Zoea (MM-30) and Mysis/PL (MM-70) stages of development. A micro-encapsulated diet of the highest quality, MicroMac is manufactured from fresh raw materials including fish roe. MicroMac is essential for any hatchery growing Penaeid shrimp. Also added are optimal levels of cholesterol, lecithin, HUFA's (including Algamac-2000) and vitamins. We have also added astaxanthin, which is abundantly found in Artemia. The dispersion and suspension properties are excellent as it will not easily breakdown in water thus keeping your water quality sound. One of the most notable features of MicroMac is how it excels as an ingestion-including agent.

MicroMac comes in two particle sizes:

Cat#	MicroMac	Micron Range	Particles/gram
ABM-99	30	10-50 (avg 30 microns)	90 million
ABM-100	70	30-100 (avg 70 microns)	30 million

Proximate Analysis

	% DRY WEIGHT
Crude Protein	47.00
Crude Fat	29.00
Crude Ash	7.00
Moisture	3.00
Crude Fiber	1.00

Ingredients: Contains: Marine proteins, purified fish roe oils, vitamins, protected minerals, and antioxidants..

Fatty Acid Profile

Name	Fatty acid	%
Myristic	14:00	0.9
Pentadecanoic acid	15:00	0.1
Palmitic	16:00	22.6
Palmitoleic	16:01	2.7
Heptadecanoic acid	17:00	0.5
Haptadecaenoic acid	17:01	0.2
Stearic	18:00	7.9
Oleic	18:01	23.1
Linoleic	18:02	11.1
Linoleic	18:02	0.7
Octadecatetraenoic	18:04	0.5
Ecosaenoic acid	20:01	2.4
Ecosadienoic acid	20:2(n-6)	0.1
Ecosatrienoic acid	20:3(n-6)	0.3
Ecosatetraenoic acid	20:4(n-3)	0.3
Ecosatetraenoic acid	20:4(n-3)	4.1
Ecosapentaenoic (EPA)	20:5(n-3)	5.9
Docosaenoic acid	22:01	1.6
Docosapentaenoic (DPA)	22:5(n-3)	2
Docosahexaenoic acid (DHA)	22:6(n-3)	11.1
Nervonic acid	24:01:00	1.1
Unknown		0.8
